

TRICORBRAUN

DUNNAGE PROGRAM

TRICORBRAUN
Canada™

ABOUT & KEY DATES

The purpose of this guide is to provide our customers with clear guidelines and expectations for the new dunnage program. This guide may be updated from time to time and will be available from your Customer Relationship Team and on our online order portal.

The original launch date for this was set for April 1st, but we managed to secure a postponed start date for the program, as we continued to push for the best program possible. As such, the new program will be launching as of May 1st, 2023, and we are pleased to inform you **that for most of our customers, there will be no upfront deposits or charges on returnable dunnage.**

Initial Dunnage Count

- Customers are required to complete an on-hand dunnage count on May 1st, 2023
- TricorBraun will reconcile these counts with our own and our supplier's
- Any unaccounted-for dunnage or missing counts may result in fees to the customer for lost dunnage

Bi-Annual Dunnage Counts

- Customers are required to submit bi-annual on-hand dunnage counts to TricorBraun on May 1st and November 1st of each year (*count dates subject to change*). TricorBraun will send bi-annual reminders
- TricorBraun will reconcile these counts against our own
- Any unaccounted-for dunnage or missing counts may result in fees to the customer for lost dunnage

Due to the nature of some of our customers (location & size) we will offer 1-WAY dunnage for some goods supplied out of our warehouses to ease the burden of logistical challenges for those customers and the cost of returns. To find out which type of dunnage is best for you, please reach out to your TricorBraun representative.

We will be continuously working to enhance this program and tools for our customers and are looking forward to ongoing feedback from you.

For the most updated terms of service, please visit <https://www.ordercans.tricorbraun.ca/en/terms>.

TYPES OF DUNNAGE

TricorBraun uses two main sources of dunnage, 2-way and 1-way. Below is a simplified breakdown of each type.

2-Way Dunnage

- Plastic pallets, slip sheets and toppers
- Cans & Ends direct from **most** manufacturers are put on 2-way dunnage
- Certain goods are only available on 2-way dunnage
- 2-Way dunnage requires bi-annual counts to be sent to TricorBraun.
- Customers are responsible for 2-way dunnage, it is expected to be returned in like-new condition
- Dunnage not returned in like-new condition or improperly stacked are subject to fees up to and including the cost of replacement dunnage (*see prices below*)
- Dunnage on-hand for longer than six (6) months are subjected to replacement fees (*see prices below*)
- Customers without terms will be required to pay for dunnage upfront

Type of product (Each)	Price (CAD) + tax	Price (USD) + tax
2-WAY Pallet	\$105.00	\$75.00
2-WAY Slip Sheet	\$4.25	\$3.00
2-WAY Topper	\$35.00	\$25.00

Pictures are for illustrative purposes only.

1-Way Dunnage

- Wooden pallets & topper with chipboard slip sheets
- Some manufacturers use 1-way dunnage
- Dunnage is not returnable
- Dunnage added to sales order and invoice with goods ordered

Type of product (Each)	Price (CAD) + tax	Price (USD) + tax
1-WAY Pallet	\$55.00	\$41.50
1-WAY Slip Sheet	\$2.00	\$1.75
1-WAY Topper	\$15.00	\$11.50

Pictures are for illustrative purposes only.

Prices are subject to change

ORDERING OPTIONS

This guide is for informational purposes only and is subject to change. To confirm what type of dunnage your order will be on, please contact our Customer Relationship Team.

Type of product	Fulfilled from	Type of dunnage available
Printed Cans, Blank Cans, Ends	Direct from manufacturer	2-WAY
Pressure Sensitive Labelled Cans (PSL)	TB Warehouses	2-WAY or 1-WAY
Shrink Sleeve Labelled Cans (SS)	TB Warehouses	2-WAY or 1-WAY
Blank Cans	TB Warehouses	2-WAY
Supplies (Trays, Paktech)	TB Warehouses	2-WAY or 1-WAY
Ends - By the sleeve	TB Warehouses	2-WAY or 1-WAY
Ends - By the pallet	TB Warehouses	2-WAY

Manufacturers may use 1-WAY dunnage as deemed necessary without notice due to supply constraints or other.

RETURN PROCESS : 2-WAY

2-WAY dunnage is required to be returned to a designated return location (see *Return Locations page*), in like-new condition, stacked as outlined in Figure 1. To ensure your dunnage return is successful, follow the below steps as there are two options to return 2-WAY dunnage. Dunnage not returned as outlined in this document could result in replacement fees.

2-WAY Dunnage Return - Full truckload (FTL) of dunnage

Your dunnage is greater than 300 pallet sets

- A full truckload of dunnage equals 300 dunnage sets
- One dunnage set equals a pallet, a top frame and slip sheets
- Full Truckload returns benefit from no charges on pickup or freight
- Freight will be arranged by the manufacturer once booked

2-WAY Dunnage Return - Less than full (LTL) truckload

Your dunnage is less than 300 pallet sets

- Less than full truckload of 2-way dunnage is still required to be kept and organized in the same manner and returned to a designated return location
- Less than full truckload returns are at the cost of the buyer
- Buyer is responsible to book and arrange freight

Tip: For many customers who do not accumulate enough dunnage for an FTL return within 6 months and/or who are not located near a return facility, 1-way dunnage is a more cost-effective solution than 2-way dunnage.

RETURN PROCESS : 2-WAY FTL

2-WAY Dunnage Return - Full truckload of dunnage

Your dunnage fills a 53' truckload (see [Stacking & Loading Dunnage](#) page for details)

1. Organize dunnage for pickup by stacking pallets, top frames and slip sheets appropriately, with reference to Figure 1 (*On previous page*)
2. Email dunnage@crowncork.com to schedule a pickup for the dunnage
3. Complete the TB Dunnage Return BoL Generator form found [here](#), click submit
4. After clicking submit the information provided will automatically be recorded by TricorBraun and will be used to generate a BoL PDF that will be emailed to you and to TricorBraun.
5. Attach a copy of the BoL to the return dunnage shipment
6. Present the form to the carrier upon pickup to fill in necessary fields and provide a signature.
7. Thank you for returning your reusable dunnage!

STACKING & LOADING DUNNAGE - RETURNING TO A CROWN FACILITY

Crown Beverage Packaging
Division of Crown Cork & Seal Co. Inc.

Return of Pallet – Packaging Materials

The packaging materials (pallets, top frames and separator sheets) used to ship quality bulk palletized cans to your filling operation are reusable. To ensure a quality package please return packaging materials as specified below..

ALL PACKAGING MATERIALS SHOULD BE PROTECTED FROM WEATHER AND STORED IN A DRY PLACE

Top Frames

Stack all top frames neatly and squarely on a 44"X56" pallet, 16 Frames per pallet.

Separator Sheets

Stack Separator Sheets neatly to a height of approximately 18 inches.

Sheet and Frame Stacking

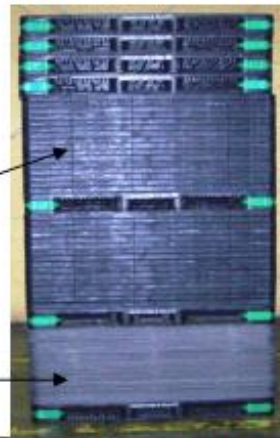

Stack 2 pallets of Frames atop the 1 Pallet of Separator Sheets with 4 Pallets atop to acquire the appropriate height.

Pallets

Pallets should be assembled in straight, uniform stacks with common runner orientation. Stack heights should be 22 pallets high All pallet stacks should be free of separator sheets, cans and debris.

Truck Loading

Pallets should be stacked to the same load height, so that the load is leveled off in the truck. This also applies to separators, top frames which, like pallets, should be piled to proper load heights for even-height stacking in the trailer. Load the trailer two pallets across and brace them to prevent movement in shipment. The loading should be finished off with two stacks of Pallets at the trucks end.

Completed Stack of Top Frames and Separator Sheets

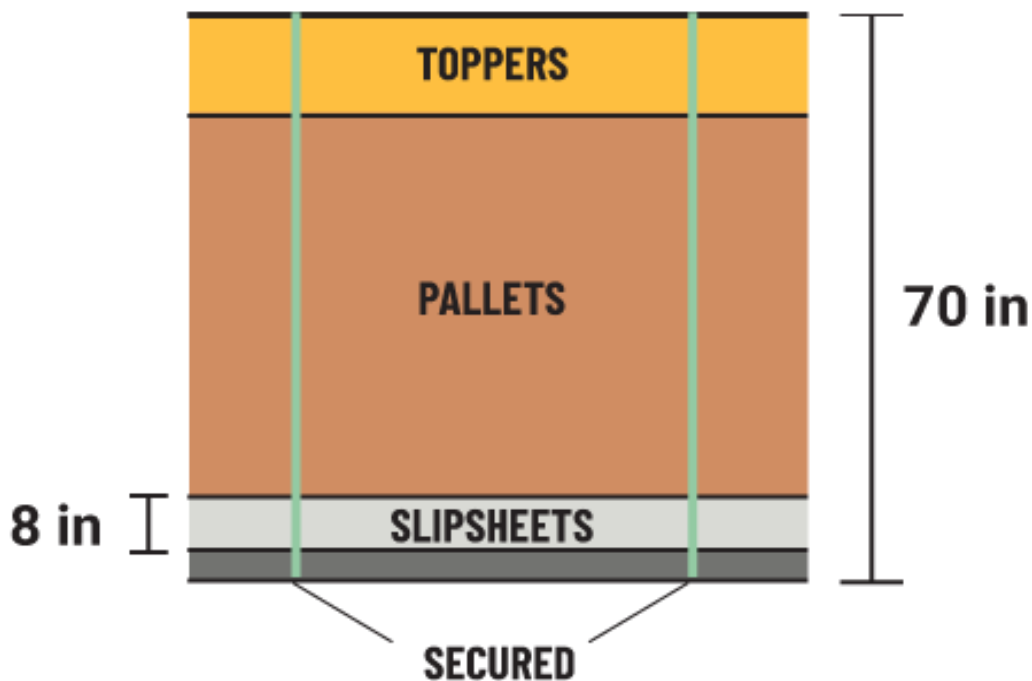

Completed Stack of Pallets

STACKING & LOADING DUNNAGE – RETURNING TO A TB FACILITY

Ensure dunnage is clean, dry and in like-new condition prior to stacking for a return.

To ensure safe handling, dunnage returns made to TricorBraun must be stacked as per the diagrams below. Please do not exceed the following maximum heights:

Stacks of mixed dunnage should have a single pallet on the bottom, followed by slipsheets, then pallets, with toppers at the top. The slipsheets should all be consolidated at the bottom and not exceed a height of 8 in when stacked with other dunnage. Please do not insert single slipsheets between pallets or toppers. The total height of all the dunnage in a stack should not exceed 70 in.

When returning large amount of slipsheets ensure they are secured between a single pallet and topper. The height of the slipsheets should not exceed 15 in.

STACKING & LOADING DUNNAGE - RETURNING TO STRYDER VBC

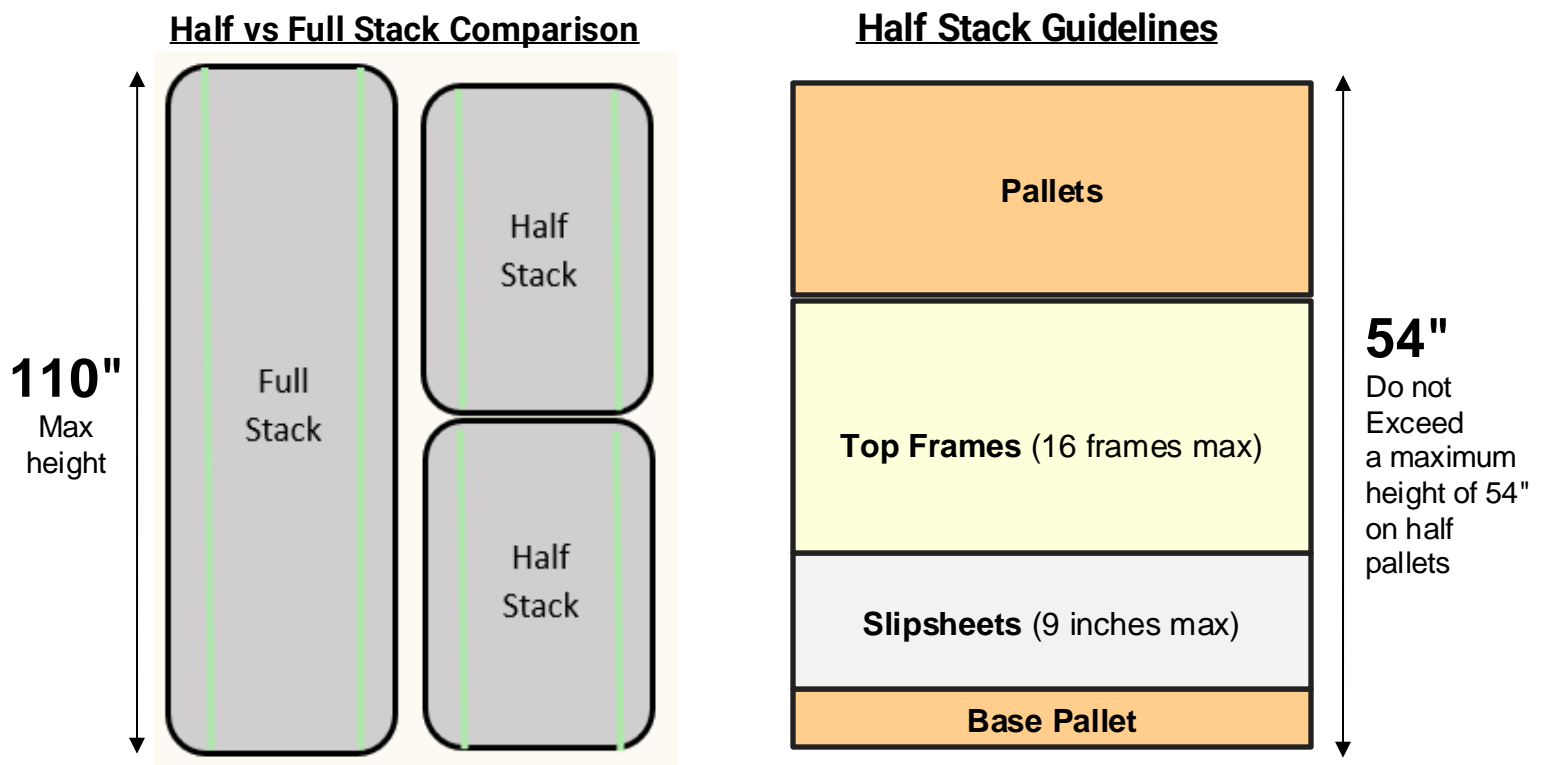

As Stryder VBC is not a full dunnage sorting facility it is imperative that dunnage is stacked according to Guidelines. As the dunnage will not be sorted, customers have the option to either return full stacks or half stacks of dunnage:

Full Stacks of Dunnage:

Full stacks of dunnage refers to any stacking configuration outlined in the Returning to a Crown Facility guidelines found on page 9. Please note if you have a large amount of full stacks, you may qualify for an FTL return and this should be sent to Crown directly.

Half Stacks of Dunnage:

Half stacks of dunnage refers to dunnage stacks that are half the height of a full stack of dunnage. The purpose of these is so that two half stacks can be stacked alongside full stacks of dunnage when shipping an FTL to Crown. **Half stacks should be made to a height of 45"-54"**. Please see the below guideline for building half stacks:

FAQ

Can I return dunnage to TB Calgary?

We ask that all dunnage is returned to the designated return locations, however exceptions *may* be made for smaller drops offs if accompanied with a pickup. Please confirm this at time of order and when arranging your dock appointment for pickup so we can try to accommodate your request. **Proper return process must still be followed.**

Can I use both types of dunnage?

Absolutely, as long as it's one type of dunnage per SKU ordered. If you would like two types of dunnage on a warehouse order, please select the type of dunnage you'd like and add any relevant comments. Please reference the Ordering Options page for more details.

I'm ordering products from a TB warehouse, which type of dunnage should I pick?

When placing an order directly from our warehouse for certain products you may select 2-WAY or 1-WAY dunnage at the time of order. Depending on your circumstances (your equipment, distance from a return facility, order volume) it may make more sense for your business to select 1-WAY.

Example: *If you are located far from a return facility and do not accumulate enough dunnage to send it back in full sets, it may be more cost effective for you to purchase 1-WAY dunnage.*

Can I return a LTL (Less than Truckload) dunnage cross border?

No, please select a designated return location in your country.

Can I return a LTL (Less than Truckload) to Crown designated return facilities?

Yes! You may send LTL dunnage to any Crown sorting facility; however, this will be at the customer expense and trucks will need to adhere to the facility's trailer requirements.

Can I pay a deposit instead of doing bi-annual counts for 2-WAY dunnage?

Customers who select 2-WAY dunnage are opting into the dunnage system, if you prefer not to worry about returns and inventory counts, 1-WAY dunnage may be right for you.

I don't want to return my 2-Way dunnage, can I keep it forever?

Customers are responsible for dunnage shipped to them; dunnage kept on hand for longer than 6 months may be charged for replacement fees.

FAQ CONTINUED

I use a copacker and don't organize my own dunnage, how does this work?

All dunnage needs to be returned on the behalf of the purchaser who is responsible for the dunnage. It is the responsibility of the purchaser to ensure that their dunnage gets returned on their behalf and the proper process is followed by any third parties.

Who organizes freight for dunnage returns?

It is the responsibility of the purchaser to organize their own dunnage returns or contact Crown to arrange a pickup. Submitting a BOL to TricorBraun does not mean we will set up the return for you, we just need documentation that the return occurred in order to reconcile. Depending on the type of return (FTL or LTL) there are different processes. For details, please see the 'Return Process' section in this program or contact your TB Representative.

How can I best track dunnage that I have on hand?

TricorBraun will continue to put dunnage quantities as line items on your invoices, either at zero dollars (customers with terms) or with the price (pre-pay customers), this allows customers to input this information in their systems. Many customers create a dunnage SKU and track the ins and outs as an inventory item.

Oops! I returned dirty dunnage; can I clean it myself instead of paying the fee?

Oh no! It happens, but unfortunately once dunnage enters Crown's return system it is not possible to recall it to clean. The best thing you can do to avoid cleaning charges is ensure it's in like-new condition (as you received it) before returning it. If you return dunnage to a TricorBraun facility and it does not pass our inspection process, you may be able to pick-up (or it may be rejected) within a designated time slot to clean your dunnage.

Why has the system changed?

Crown has seen a decrease in dunnage being returned, this program is designed to encourage returns while having minimal financial impact on customers who are diligent about their dunnage.

Where and how should I store my dunnage when accumulating a return?

Dunnage should be stored inside in a dry and dust free environment. To make it easier when it's time for a return, stacking dunnage carefully and as per the guidelines so you won't have to re-stack.

What if I returned dunnage and didn't fill out the BOL with TricorBraun?

You risk remaining liable for that dunnage as we have no way to know you returned it! TricorBraun needs to know what you are returning live so we can ensure it reconciles with Crown's data.
